How to buy NFTs?

In **three** steps everything is taken care of!

Step 1: Before you can buy NFTs, you need an online wallet to pay with. Here is the explanation on how to install a MetaMask wallet, the most used wallet in if you want to buy NFTs.

1. Go to **Opensea.io**, click on the profile icon in the upper right corner and select "My Profile".
2. Click on "Get MetaMask" and download the appropriate extension. You can install this on your browser only on Chrome, Firefox, Brave or Edge. However, you can install it on both operating systems of iOS and Android.
3. Click on "Install MetaMask".
4. After the extension is added, you should see a page that says "Welcome to MetaMask. Click on "Get Started."
5. Select "Create Wallet."
6. Create your password! Take a screenshot and/or write down the secret phrase. This is your personal backup access to your account. **You must not lose this one**, or you will not be able to get back into your account!
7. Click "Next", select the secret phrase in order and tap "Confirm". If you arrange the secret phrase correctly, you should end up on a "Congratulations" page. Click "All Done."
8. If you get a pop-up about swapping tokens, you can click the "X" button to exit.
9. Click "Next" to connect your OpenSea account to the MetaMask wallet. Then click "Connect" again.
10. Great! You've created your online crypto wallet. Now it's time to fill the wallet with Ethereum.

How to buy NFTs?

Step 2: Buy Ethereum ("ETH") with MetaMask. You will need this in order to be able to buy NFTs.

- 1. You can buy ETH using the MetaMask wallet created in step 1.**
- 2. Click the MetaMask fox icon in the top right corner of your browser.**
- 3. Click "Buy" or select "Instant Ether Deposit" if you already have ETH in another wallet (eg Coinbase).**
- 4. Click on "Continue to Wyre".**
- 5. Choose how much Ether you want to buy. There are transaction costs (for Wyre) and network costs (i.e. so-called 'mining costs') every time you buy, so make sure you buy enough so that these additional fees don't have to be paid unnecessarily often.**
- 6. Choose your payment method (credit card/Apple Pay) and click "Next".**
- 7. Enter your payment details and click "Submit".**
- 8. Enter the payment verification code you received on your phone.**
- 9. Authorize the purchase by entering the six digit code for an pending Wyre transaction into your bank account.**
- 10. Within a few minutes you will see a balance update in your MetaMask wallet!**

Step 3: Buy or make an offer on NFTs.

- 1. Go to the NFT you want to buy and then click on "Buy Now".**
- 2. Check the boxes to agree to the terms and then click "Checkout".**
- 3. Your MetaMask wallet will open and you will be able to see the total purchase price. You will then see a 'Gas fee'. This is a required fee to process the transaction in the Ethereum network. This fee varies wildly depending on how much activity there is on the network.**

How to buy NFTs?

Step 3: Making a bid on an NFT.

1. Some NFTs are sold through auction and you can place a bid on these NFTs! Sometimes you can also bid on an NFT that you could also buy right away.
2. Click on "Make an offer".
3. Your bid will be placed in WETH (Wrapped ETH), a form of ETH currency that is tradable. **Carefully** choose the amount of WETH you want to bid (USD is shown on the right).
4. Click "Convert ETH".
5. Confirm the amount and then click on "Wrap". Please note that there are transaction fees every time you convert ETH to WETH. So if you plan to bid on multiple NFTs, it is more convenient to convert a larger amount.
6. Your MetaMask wallet will reappear and you will be asked to confirm the total amount.
7. You will see the converted balance of ETH and WETH in your MetaMask wallet.
8. Select "Confirm" and then go to "Bid" again.
9. Enter the amount you want to bid and click "Bid".
10. Your MetaMask wallet will appear and you will see the total purchase price. For bids, you may only see a "Gas fee" if this is your first transaction.
11. Select "Confirm" to finalize the offer.
12. When the MetaMask wallet, click on "Sign".
13. Congratulations! You have successfully placed a bid! You should see your bid appear in the 'Offers' section. Now wait and see if no one outbids and if it is accepted.
